

Early Years Curriculum

Our foundation unit is a purpose built facility which provides accommodation of the highest standard for our nursery and reception children and has its own enclosed activity area.

The establishment of a foundation stage is a significant landmark in funded education. It gives this very important stage of education a distinct identity and the early learning goals set high expectations within a play based curriculum. The Early Years Foundation Stage incorporates six areas of learning; Personal Social and Emotional Development, Communication Language and Literacy, Problem Solving and Numeracy, Knowledge and Understanding of the world, Physical Development and Creative Development.

During the summer term a careful and planned transition will take place between Nursery and Reception as well as Reception to Year 1.
